BONDS	Link to SDG	Support social projects related to skills development for employability and entrepreneurship, youth employment, social/affordable housing, access to essential services and affordable infrastructure. These bonds usually target population living below the poverty line, excluded and/or marginalized populations and/or communities, people with disabilities, migrants and/or displaced persons, underserved, unemployed, aging populations, vulnerable youth and other vulnerable groups.	Support social projects aimed at food security and sustainable food systems (e.g. physical, social, and economic access to safe, nutritious, and sufficient food that meets dietary needs and requirements; resilient agricultural practices; reduction of food loss and waste; and improved productivity of small-scale producers).	Support social projects related to addressing the fundamental gaps in accessibility, affordability, and quality of healthcare, health systems development, construction and/ or rehabilitation of hospitals and healthcare centres, among others.	Support projects that enhance quality education by targeting school infrastructures, providing services or devices such as training, and laptops, providing educational opportunities for students, and expanding access to primary, secondary, adult and vocational education through the construction of public schools and student housing, and the financing of educational loans.	SBP or SLBP, and which focus exclusively on gender equality, are often referred to as gender bonds. These	Support social projects aimed at supporting productive activities, decent job creation, entrepreneurship, creativity and innovation, and encourage the formalization and growth of MSMEs, including through access to financial services.	Support social projects aimed at aiding refugees, migrants, and low-income and displaced persons. Projects usually target social housing, education and vocational training, health and social care and employment generation, and programs designed to prevent and/or alleviate unemployment stemming from socioeconomic crises, including through the potential effect of SME financing and microfinance.

LOANS	Link to SDG	• Support social projects related to employment generation, and programs designed to prevent and/ or alleviate unemployment stemming, affordable housing, access to essential services and affordable infrastructure. These loans usually target population living below the poverty line, excluded and/or marginalized populations and/or communities, people with disabilities, migrants and/or displaced persons, underserved, unemployed, aging populations, vulnerable youth, and other vulnerable groups.	Loans that support social enterprises and small farmers working to help build a more equitable, sustainable, and resilient food and agricultural system, increasing access to healthy food, cultivating equitable local food systems, developing regenerative agricultural practices, strengthening fair trade supply chains, providing equitable access to farmland, and helping fight food insecurity.	Loans are used to fund, for instance, emergency responses and improvement of healthcare sector resilience, strengthening of infrastructure and equipment of the health sector and support to health service providers such as hospitals, clinics and nursing homes.	• Loans supporting social projects are used to fund, for instance, the development of education projects and activities to offer better learning, development of training programmes that provide better access to employment opportunities, public and private educational infrastructure facilities, student housing to contribute to students' tertiary education retention rates, student loans; among others.		Loans that help reduce the financing gap for MSMEs, encourage their formalization and growth, the expansion of productive activities, and create employment and economic opportunities for vulnerable segments.	Loans that enable economic and social participation across diverse populations, particularly for people disproportionately affected by systemic inequality and the disparities in access to the opportunity it creates. They usually benefit minorities, migrants and refugees, addressing, for instance, affordable housing, social care facilities, and social migrant integration and employment.

IMPACT BONDS	Link to SDG	Support interventions and funding social services related to housing, child and family welfare, social protection, among others. These bonds usually target vulnerable groups, such as youth and young adults, women, and migrants.	Expand funding from the private and non-profit sectors to support projects aimed at improving food security and sustainable food systems, including access to nutritious, and sufficient food; resilient agricultural practices; reduction of food loss and waste; and improved productivity of small-scale producers.	Target specific diseases or behavioural change related to health concerns and health promotion programs, long term condition management, service design improvement to reduce emergency admissions, medical supplies and equipment, construction and/or expansion of medical centres, research and development for medicines, vaccines and treatments, pilot projects for disease prevention, among others.	• Expand funding from the private and non-profit sectors to improve education through incentives and greater accountability. For instance, they have been targeted at increasing access to quality early childhood, education services incentivizing private-sector service provision, increasing enrolment of marginalized children and children's progress in literacy and numeracy outcomes and improving teaching outcomes, delivering an intervention building teaching capacity within kindergarten and primary school settings, and improving the quality of education in low performing basic education schools.	Expand funding from the private and non-profit sectors to improve gender equality. For instance, they have been targeted at enabling individual women entrepreneurs in specific sectors to access affordable loans, employability and professional and vocational skills development for women, improving women's education and health, among others.	Support interventions and funding social services related, for example, to workforce development, improvement of employment opportunities and financing education and training to help unemployed and underemployed people.	Targeted at support to unemployed persons and integration in the labour market, improvement of access to services by certain population groups such as informal workers, chronic homelessness and assistance to secure sustainable housing, employment and other goals, child and family welfare such as family assistance programmes and improvement of parenting skills, reincarceration, reduction of recidivism and social inclusion of convicts, among others.

Impact Measurement: need to define clear eligibility criteria and selection process and provide transparency of economic characteristics linked to the borrower's ability to meet social targets; lack of precedent in SIBs development and implementation and institutional knowledge and resources to accurately measure performance against social KPIs; absence of data on costs and the relative benefits compared with alternative financing mechanisms; need for a harmonised framework for impact reporting for social loans (identification of indicators for managing proceeds and determining project eligibility and objective metrics to value the impact achieved); need for a clear framework to assess their contribution to the SDGs and interlinkages between SDGs to report on the potential adverse impacts. Enablers: Impact Lab by GIIN Awareness and Technical Assistance: limited awareness and education among governments or public authorities, investors and service providers of the potential impact of SIBs, and of the risks and opportunities associated with investing in SIBs; need to access to contextual data on the enabling environment and other financial flows, as well as data about social needs. Enab

FINANCIAL INSTRUMENT / SDG	1 POVERTY	2 FERTI HISTORIA	3 GOOD HUALTH —///	4 EDUCATION	5 conser	8 DECENT WORKS AND SECONOMIC GROWTH	10 MEDICALTIES
IMPACT INVESTME NT FUNDS Link to SDG	SII Funds make venture capital and seed capital investments into companies with social impact and fund social businesses and organizations that have the potential to create new opportunities for vulnerable people or to develop marginalised local communities, fostering or focusing on financial inclusion, educational and professional re-/training opportunities, recidivism programs, employment programs, affordable housing, eviction prevention, violence prevention, among others.	<u> </u>	SII Funds finance businesses and organizations that serve the population with access to affordable health products and services and good quality health workers, medicines, and technologies. They can make venture capital and seed capital investments into high-impact and innovative early-stage health enterprises serving vulnerable communities and providing digital solutions to secure healthcare. Business types include laboratories and pharmaceutical companies, health clinics and health facilities, tech companies, among others.	• SII Funds finance businesses and organisations that ensure equal access to all levels of education and/or vocational training for the population, provide support to teachers and educators or focus on supporting affordable education development. Business types include primary, secondary, and higher educational facilities and schools; organisations that design and deliver vocational and professional training targeting students, educators and general professionals; organisations that mobilise student loans for low-income populations and technology companies.	• Gender Lens Investing is "a strategy or approach to investing that takes into consideration gender- based factors across the investment process to advance gender equality and better inform investment decisions". Gender Lends Funds invest with the intent to address gender issues or promote gender equity by allocating capital, for instance, in women- owned or women-led enterprises, in enterprises that promote workplace equity; or in enterprises that offer products or services that substantially improve the lives of women and girls.	SII Funds focus in private sector development and equity financing for small and medium-sized enterprises (SMEs) and innovative small businesses, stimulating growth and helping them expand their operations.	SII Funds finance businesses and organizations that promote social, political, and financial initiatives. These include enterprises supporting asylum, migrations and integration measures, promoting social protection and inclusion, employment and labour market access and mobility, and financial inclusion. For instance, SII Funds can target minority empowerment, providing exposure to companies with strong racial and ethnic diversity policies in place, among others.

	ase tudies	Bamboo Financial Inclusion Fund (Luxembourg, 2007): makes equity and quasi-equity investments in financial institutions that contribute to increased financial inclusion of unbanked populations in Africa, the Middle East, Asia and Latin America. Vox Impact Investing Fund (Brazil, 2009): invests in innovative, high-potential companies serving the low-income population whose activities contribute to poverty reduction.	African Food Fund (Luxembourg, 2010): the Silk Private Equity food fund was established to pursue direct equity investments in the consumer market throughout Africa focusing mainly on food and beverage. Phatisa Food Fund II (Africa, 2021): focused on African agriculture and food value chain with a focus on inputs to food production, integrated food production and processing, food manufacturing, and fast-moving consumer goods and food service.	Healthquad (India, 2016): invests in innovative models which transform healthcare in India and make an inclusive impact on our communities. Investment Funds for Health in Africa (Netherlands, 2007): invests in small to medium size (equity) investments in private healthcare companies in Africa.	New Harbor Capital (United States, 2017): invests across the education landscape, from K-12 to post-secondary education, to skills gap and corporate training. Educapital (France, 2017): seeks to invest in early-stage education and ed-tech companies based in Europe.	• SEAF Women's Opportunity Fund (United States, 2017): applies SEAF's gender	Kukula Seed (Zambia, 2015): To promote the development of small and medium scale enterprises in Zambia in order to support job creation, sustainable economic growth and development.	Kinyeti Venture Capital (South Sudan, 2012): established in 2012 as a joint venture between Norfund and Swedfund. As part of an investment strategy for fragile states, makes risk capital investments in profitable enterprises in South Sudan. The Peace Investment Fund (Switzerland, 2018): invests in global, listed equities targeting multinational companies with important economic impact in fragile states and that have a net positive impact according to the Peacebuilding Business Index co-developed by PeaceNexus and Covalence.

CATALYTI C FIRST LOSS CAPITAL Case Studies	Community Finance Fund For Social Entrepreneurs (Australia, 2011): the Australian Government's Social Enterprise Development and Investment Fund (SEDIF) provided usd 4.2 million for the purposes of CFLC to Christian Super, a not- for-profit superannuation fund. This allowed to provide investors with exposure to a diversified finance portfolio devoted to the social enterprise sector and finance for low- income populations.	• California Freshworks Fund (United States, 2011): The California Endowment (TCE), JPMorgan Chase Foundation, and the U.S. Treasury's Community Development Financial Institutions Fund provided usd 7.5 million as grants to increase access to healthy, affordable food in underserved communities, spur economic development, and drive innovation in healthy food retailing.	Medical Credit Fund (Regional - Africa, 2009): The Fund's capital base of first loss is funded by grants from public and private parties and this serves as a risk cushion for investors, comprising a mix of private investors and semi-public development finance institutions.	• Democracy Prep Charter School (United States, 2011): Civic Builders provided usd 7.5 million for the purposes of CFLC to The Low Income Investment Fund (LIIF). This allowed to support a high-quality charter school by transforming a dilapidated church vestry into an appropriate facility for students and teachers while ensuring the affordability and sustainability of a permanent school facility.	WWBCP II (2022): the European Union ("EU") and the German Federal Ministry for Economic Cooperation and Development ("BMZ") facilitated by the German development bank KfW provided critical funding to the Women's World Banking Asset Management for the first loss tranche.	• IFC's IDA Private Sector Window & Union Bank (Nigeria, 2021): pooled first-loss guarantees to support new working capital loans, products and services to SMEs and to expand the bank's lending portfolio, with a particular focus on the harder-to-reach smaller SMEs.

MICROFIN Link to SDG	Microcredits help low-income households to stabilize their income flows and save for future needs. Microfinance Institutions (MFIs) can provide microcredit to ensure funds for low-income borrowers, improve financial planning skills and literacy and better access to credit, improve living conditions and help rebuild communities, etc. Microinsurance play a role in reducing vulnerability and contributing to poverty alleviation and in allowing risk-taking activities that would increase income or assets, and thus help lift people out of poverty.	Microcredits provide clients, especially smallholder farmers, access to credit, helping to purchase improved inputs and agricultural equipment and supporting household food security while agricultural microinsurance can protect smallholder farmers from climate-related shocks.	Different types of health microinsurance products can be defined by the benefit payment trigger and whether the payment is a predefined sum of money or whether is indemnity insurance. Types of health microinsurance products include: hospital cash (pays out a predefined lump sum for either each night of stay in hospital o per hospital episode), package of outpatient and/or impatient cover (focuses on one set of procedures), and lump sum pay-outs on the diagnosis of a particular disease.	Microcredits provide financing for students at all stages of their academic or vocational education, used to cover educational expenses and tuition at all levels of learning, from vocational and training courses to graduate and postgraduate degrees.	Microcredits help women to establish or start a project to earn an income and support themselves and their families. Provide women leading micro, small, and mediumsized enterprises access to finance. Usually supported through a network of programs and activities, including individual entrepreneur support and financial education. Microinsurance include life/ disability coverage for women, and maternity cover to address women's health needs and innovative health insurance policies and basic health assistance, in order to help women entrepreneurs mitigate hardships and boost their wellbeing UNITER	Microfinance paired with financial education or entrepreneurship training, awareness-raising campaigns together with business development services on formalization, the introduction of new loan products, training on productivity, and provision of microinsurance serve to increase the formality of enterprises, enhancing business performance and creating incentives to improve working conditions.	Microfinance can provide access to financial services having a positive impact on reducing inequalities of minorities or segments of LDC populations. They give excluded populations, such as women, migrants and refugees, access to affordable financial services. They can be intended to benefit the most vulnerable people as they move into productive economic activities, providing small loans to microentrepreneurs and assisting them with finding employment.
